

Longhill Saturday Science Club

The Longhill Saturday Science Club is a FREE club for Year 5 & 6 students. If you are interested in science and would like to carry out some experiments in our science labs then this is the club for you.

The sessions will be run by experienced science teachers at Longhill High School.

Each week has a different theme and different experiments. The sessions run from 9.30 am to 12.30 pm but places are limited so sign up NOW!

Sat 1st October - *Sound and Light* - A sonic adventure where you will investigate Lasers, Sound waves, build your own Vortex Cannon and more.

Sat 8th October - *The Chemistry of Gas* - Make and test 3 gases using some impressive chemistry. Investigate the chemical reactions between Mentoies and coke. Finish the day with some explosive chemical demonstrations

Sat 15th October - *Microscopic life* - Use microscopes to look at fungi, bacteria and microscopic pond life. You will also get to look at some of your own cells.
